The top of each valve also has a seal which prevents valve cover oil from ending up in the engine. Each seal is constructed out of a highly durable rubber material. However, this material does get worn out over time which results in the valve guide seals

going bad. 5 Symptoms of a Bad Valve Guide Seals and Replacement Cost Bad valve seals will show themselves during prolonged idling at stop signs or stop lights in congested city conditions. When the vehicle sits at idle for prolonged periods, high levels of vacuum at the intake manifold result because the throttle valve remains closed. The high vacuum attracts oil in the heads to congregate around the valve stems.
