pdf free natural capital valuing the planet manual pdf pdf file

Natural Capital Valuing The Planet Helm argues for a basic principle of conserving natural capital - ecosystem services and other renewable resources, and non-renewable resources - from generation to generation. His basic proposal is that the total stock of natural capital should be preserved. This allows some degree of substitution and policy flexibility. Natural Capital: Valuing the Planet: Helm, Dieter ... Natural capital is what nature provides to us for free. Renewables—like species—keep on coming, provided we do not drive them towards extinction. Non-renewables—like oil and gas—can only be used once. Together, they are the foundation that ensures our survival and well-being, and the basis of all economic activity. Natural Capital: Valuing the Planet by Dieter Helm Helm argues for a basic principle of conserving natural capital - ecosystem services and other renewable resources, and non-renewable resources - from generation to generation. His basic proposal is that the total stock of natural capital should be preserved. This allows some degree of substitution and policy flexibility.
