... Vacuum and Pressure Relief Valves. Vacuum and pressure relief valves from Grainger are variable-pressure relief valves, specifically designed to be installed into the head of a small (less than 2 HP), direct-drive, tankless air compressor. Vacuum and Pressure Relief Valves - Grainger Industrial Supply Pressure/vacuum relief valves are protection devices which are typically mounted on a nozzle opening on the top of a fixed roof atmospheric storage tank. Their primary purpose is to protect the tank against rupturing or imploding. What are Pressure/Vacuum Relief Valves (PVRV)? PROTEGO® pressure and vacuum relief valves with full-lift pallet discharge the flow within 10% overpressure from the set pressure

Vacuum relief valves are used in water heater/tank applications to automatically allow air to enter into the piping system to prevent vacuum conditions that could siphon the water from the system and damage water heater/tank equipment. These valves are suitable for low pressure steam and water service, and are ideal for use in water heaters and supply tanks, table top heaters, jacketed steam kettles, unit heaters, low pressure steam systems, and steam coil heaters.
